Title: NESHAP for Paints and Allied Products Manufacturing Area Source Category
(Renewal)

ICR Numbers: EPA ICR Number 2348.03, OMB Control Number 2060-0633.

ICR Status: This ICR is scheduled to expire on February 28, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart CCCCCCCC.

Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required annually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1 hour per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and

disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are the owners or operators of paints and allied products manufacturing facilities.

Estimated Number of Respondents: 2,190

Frequency of Response: Initially and annually

Estimated Total Annual Hour Burden: 4,533

Estimated Total Annual Cost: \$1,172,604, which includes \$1,172,604 in labor costs, no capital/startup costs, and no operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden costs for the respondents as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The increase reflects an adjustment in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate all labor costs.

However, there is an adjustment decrease in the total burden hours and Agency costs from the previous ICR. The change in the burden and cost estimates occurred because the standards have been in effect for more than three years and the requirements are different during initial compliance (new facilities) as compared to on-going compliance (existing facilities). The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes conducting performance tests, notifying initial

compliance status, and establishing recordkeeping systems. This ICR, by in large, reflects only the on-going burden and costs for existing facilities. Activities for existing sources include continuously monitoring of pollutants and the submission of annual reports. Specifically, this ICR includes the burdens associated with annual compliance certification and exceedance reports. Respondents must submit these reports to the Agency only if a deviation from the requirements of this subpart has occurred. This ICR assumes ten percent of respondents will submit these reports annually for Agency review. These changes result in a net decrease in the respondent and Agency burden hours, as well as a decrease in Agency labor costs.
